

MRC Summit Award for Manufacturing Excellence 2008

The Manufacturers Resource Center (MRC) is pleased to recognize ProtoCAM with the MRC Summit Award for Manufacturing Excellence.

ProtoCAM continually invests in improving its operations through enhancing its image, sales and connectivity to its customers through enhanced website development, design and functionality. With the bulk of their business on the web, the company is constantly looking for ways to improve their product, increase their market share, and deliver on their customers' fast turnaround expectation. More than any other vehicle, the Internet matches the needs of ProtoCAM's market, image and clients. The company management recognizes the need to continually hone their Internet and web skills to meet the requirements and expectations of not only current, but future customers.

In addition, MRC applauds ProtoCAM for their continuous commitment to investing in their local community through significant quality employment even in difficult times. We commend them for their contributions to the local economy, leadership, and manufacturing in the region.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Pfunder", is positioned above the typed name.

Jack Pfunder
Executive Director/CEO
